TITLE : REINFORCING PULP, INORGANIC PAPER MAKING SHEET USING THE SAME AND
MANUFACTURING METHOD THEREOF

ABSTRACT : PROBLEM TO BE SOLVED: To provide a new reinforcing pulp that enhances a yield in the papermaking step and ply adhesion of a green sheet in preparing an inorganic papermaking sheet and that imparts excellent properties to the inorganic papermaking sheet, to provide an inorganic papermaking sheet using the same and to provide a manufacturing method thereof.

SOLUTION: The reinforcing pulp is characterized in that the Canada standard freeness obtained by beating a mixture of 45-95 mass % of an unbleached pulp and 5-55 mass % of a bleached pulp is in the range of 100-300 ml. Further, the inorganic papermaking sheet comprises 3-9 mass % of the reinforcing pulp.
